My process

Built with

- Semantic HTML5 markup
- CSS custom properties
- Flexbox
- CSS Grid
- Desktop-first
- uiverse - For components
- Font awesome

Useful resources

[googlefonts](#) - This helped me for get fonts . I really liked this website and will use it going forward.

[w3school](#) - This is an amazing article which helped me finally understand Css Grid and Flexbox. I'd recommend it to anyone still learning this concept.
